Niagara Peninsula Children's Centre - Program Descriptions

Infant and Preschool Services (Birth - SK eligible)

Early Intervention and Preschool Therapy Teams: Provides co-ordinated occupational therapy, physiotherapy, speech-language pathology and social work service with developmental pediatric input for clients with multidisciplinary needs.

Specialized Group Therapy: Provides education and activities for infant and preschool clients and their caregivers in specific areas of need.

Parent language training programs e.g., "More Than Words", "It Takes Two to Talk", "Talking Hands"

Feeding groups e.g., "Happy Meals", "Snack Attack"

Jump and Jive and **Wiggles and Giggles** – encourages development of gross motor skills

Get Set to Print – A pre-printing program to develop readiness for future printing and cutting

Stepping Stones – A social and learning group experience for children 18 – 36 months

Specialized Preschool Programs: Provides nursery and preschool programming for clients ages 2 – 5 years with multidisciplinary needs.

School Age Services

School Age Therapy Team: Provides Physiotherapy, Occupational Therapy, Speech-Language Pathology and Social Work to clients who have had a significant change in function, acquired injuries or are new to the Niagara Region.

School Intervention Team: Provides Physiotherapy, Occupational Therapy, Speech-Language Pathology, Social Work and Augmentative Communication Support for children enrolled in the Niagara Peninsula Children's Centre School.

Services offered for all Clients (Birth to 21 years)

Unidisciplinary Services: Provides physiotherapy services for clients of all ages with gross motor limitations, occupational therapy for infants and preschoolers with fine motor and sensory needs.

Communication Assessment and Support Team (CAST): A designated ADP clinic that provides high and low tech communication aids for clients whose speech and writing does not meet their daily needs. Education about augmentative communication is also provided.

Developmental Pediatric Clinic: Provides diagnostic services to children with developmental delays through consultation with a Developmental Pediatrician.

Physical and Rehab Medicine Clinic: Provides consultation with a Psychiatrist for clients regarding diagnosis and plan of care including transition to adult care.

Gait Lab: Provides a 3-dimensional analysis of the gait cycle for clients with atypical gait patterns.

Orthopedic Clinic: Provides orthopedic consultation with an Orthopedic Surgeon for clients with developmental delay or neurological involvement.

Splinting/Casting Clinic: Provides casts and basic splints (not orthotic devices) for clients with orthopedic or neurological impairment. This clinic provides services for upper and lower extremities.

Psychology Services: Provides cognitive assessment services to support planning for educational and therapeutic resources to aid in the client's development.

Seating Clinic: Provides power and manual wheelchairs, strollers and inserts to clients without functional ambulation. Education on seating systems and assistance in obtaining funding are also provided.

Pool Programs: Provides aquatic therapy and swim instruction for clients who require water as a modality to reach their functional goals and/or clients unable to participate in community based programs due to their diagnosis. Pool programs include Zip and Dip-a modified Red Cross Swim Instruction program, Infant Swim and Family Swim.

Snoezelen: Provides a full range of sensory stimulation & enjoyable experiences in an atmosphere of trust & relaxation.

Special Services at Home: A government program which provides families with funding for respite or developmental programming.
